

Eureka Transnational Lightweighting Call

International Submission Deadline 25 April 2023

Lightweighting is a key enabling technology that provides environmental-friendly solutions, while at the same time adding commercial value, across all industries. Driven by mobility-linked challenges, lightweight technology is the path to fundamental resource savings. Realizing that **collaboration across borders within leading European regions and worldwide is essential** for access to customers, technologies and best practices for all stakeholders' businesses and research institutions:

A call for projects has been launched following Eureka's Network projects framework based on mutual consent between participating national and regional funding bodies: **Austria, Belgium (Flanders & Wallonia), Canada, France, Luxembourg, South Korea, Spain, Sweden, and Switzerland** have allocated funding for organisations collaborating on international R&D projects in the field of Lightweighting.

International webinar for the Eureka Lightweighting call

08 February 2023 14:00 CET, 08:00 EST, 22:00 KST

online, registration is mandatory: <https://bit.ly/3kzIPbl>

In this webinar you will get insights into the **Lightweighting R&D strategy in the European and global context** and into the Eureka activities aimed to promote Lightweighting. Learn about the **timeline and challenges framing the Eureka Lightweighting call**. The **submission process for projects** will be illustrated and the funding agencies of Austria, Belgium, France, Canada, Luxembourg, Sweden, Switzerland, Spain and South Korea will present their **national focus and procedures**. You can also pitch your project idea to representatives of industry, research organisations, and funding bodies.
